

# CLEAN ZONES

PORTFOLIO

# CLEAN ZONES

Clean zone is dedicated space in which the concentration of airborne particles is controlled, and which is constructed and used in a manner to minimize the introduction, generation and retention of particles inside the zone, and in which other relevant parameters, e.g. temperature, humidity and pressure, are controlled as necessary. This zone may be open or enclosed, and may or may not be located within a cleanroom.

## OUR COMPANY MANUFACTURES TWO TYPES OF CLEAN ZONES:

### A STATIONARY CLEAN ZONE

Clean zones can be produced stationary when their structures are fixed rigidly on the floor, walls, ceiling and other load-bearing structures of the room.

### A MOBILE CLEAN ZONE

Clean zones can be produced mobile when it is necessary to move zones around the room.
